ABOUT US

ABOUT WORLD AI SHOW

World AI Show is a thought-leadership-driven, business-focused, global series of events taking place in strategic locations across the world. The show is part of a world tour that is taking place in Amsterdam, Mumbai, Mauritius, Nairobi, Dubai & Singapore.

It connects top AI experts, enterprises, government representatives, data scientists, technology leaders, startups, investors, researchers, academicians, and global AI innovators - all under one roof.

ABOUT WORLD BLOCKCHAIN SUMMIT

After successful editions in India, UAE, Kenya, Russia, Germany and Singapore, it is now moving on to more than 15 countries across the world.

World Blockchain Summit connects global blockchain experts and technology players in this space including emerging startups – with regional businesses, governments, IT leaders, investors and blockchain developers from across the world.

ABOUT TRESCON

Trescon is a global business events and consulting firm that provides wide range of business services to a diversified client base that includes corporations, governments and individuals.

Trescon is specialised in producing highly focused B2B events that connect businesses with opportunities through conferences, road shows, expos, demand generation, investor connect and consulting services.

Bolstering the Mauritius economy by deploying a definitive AI & Blockchain Industrial Strategy for Governments, Enterprises & Industries across Smart City Island Nations

With a rising GDP of over \$15 billion, Mauritius is ranked as one of the best-run countries in Sub Saharan Africa, and the island nation is now truly an economic epicenter because of its advancements in technology & infrastructure across diversified industry sectors

The 3-day initiative will host over 400 local, regional, international delegates and project stakeholders from across the globe who share a common objective in developing the Artificial Intelligence and Blockchain landscape, as Mauritius takes the lead for advocacy and implementation across Smart City Island Nations.

These gatherings will be chaired and moderated by global experts and technology innovators in the AI and Blockchain space.

This initiative will also support Mauritius' vision to enable governments, enterprises and industries to implement the latest innovations that shape the AI and Blockchain roadmap in the following sectors:

- Healthcare
- FinTech Services
- Smart Cities
- Smart Education
- Industrial IoT & Manufacturing
- Digital Public Services
- Transportation
- Supply Chain
- Emergency Management

The Seven Pathways of the Transformative Journey to a High Income Country

The Republic of Mauritius & its supporting Governments, are charting seven main pathways, to create new economic avenues, that will drive the Transformative Journey to attain the status of an inclusive high-income country based on innovation and sustainable value creation.

Empowering the youth to be highly skilled in technology & innovations

New wave of import substitution industry and revive export led production

Securing sustainable development to drive significant investments to protect and enhance the environment

Fully uphold its public responsibility to create an inclusive and caring society.

Private investment opportunities for digitization via Artificial Intelligence Blockchain technologies and FinTech

Build a strategic & modern infrastructure, essential to achieve a high income economy status

Establish technologically advanced & sustainable living communities with investments in health, sports and education sectors

Creating new opportunities for private investment to strengthen the foundations & development of the AI & Blockchain ecosystem

Mauritius AI Council

- Innovation is the basis for long-term economic growth and improvements in living standards
- Policies are being framed to create new opportunities for private investment and employment
- The MAIC will comprise of members from the public and private sectors, as well as international experts in this new field. The Council will spearhead and drive AI related activities and advise Governments on the way forward
- The digital revolution enables island nation economies to drive a the traditional industrial development
- Under the auspices of the Prime Minister's Office, a Steering Committee will be setup, comprising representatives of relevant Ministries to ensure greater coherence in the digitization of public-sector services and the monitoring of its implementation in a timely manner.
- Government Scholarship Programs, for top 50 Candidates to specialize in digital technologies, including AI & Blockchain.
